

ABR Slates Counter Days and Hot Dog Roast

Wednesday, May 29 is the day for ABR Wholesaler's annual Counter Days and hot dog roast. This is the day every technician in the city makes sure that he/she is in the vicinity of 510 North Goodman Street at noontime. There's always great food, includ-

ing red and white hot dogs, grilled to perfection by Chef **Matt McGarry**. With your hot dog(s), you'll enjoy all the fixin's. Plus, it's usually a nice warm day. Just right for taking an extra few minutes for lunch!

While the food's the main rea-

son people stop at ABR that day, the hot dogs are the draw to get you there so you can see displays and representatives from Radiant Technology and Grundfos, California Economizer Zoning Systems and Renzor Products.

Seminars Continue

(Continued from Page 5)

capabilities of the new Simplicity control, which is a standard feature on Preditors, York's 6.5 to 12.5 ton rooftop units, will be covered.

Both seminars are from 5:00 until 8:30 p.m. at Upstate Systems, 3277 Brighton-Henrietta Town Line Road. The \$35 cost includes dinner and refreshments. New Yorkstar training manuals and superheat/subcooling calculators will also be issued. All skill levels are welcome.

Geck Supply

Certification is needed to buy and install the TracPipe that is in Geck's ad. So many technicians wanted to earn that certification at last month's seminar that Geck Supply has scheduled another seminar for Thursday, May 23, starting at 3:30 p.m. It's free, lasts an hour to an hour and a half, and will be held at Geck Supply, 620 Meigs St. For information, call 271.8311

What Makes A Rheem Air Conditioning System Better Than The Competition

Copeland® Compliant Scroll®

Copeland's new scroll compressor is the key to efficiency for Rheem air conditioners. It's the latest in high-efficiency compressor technology. The advanced compliant scroll compressor offers low noise and vibration characteristics and features tolerance to liquid refrigerant and system contamination. The Copeland Compliant Scroll also has low start torque, eliminating start problems in the field. And its unique design enables the RAKA-Condensing unit to perform more efficiently.
