Coils are constructed of enhanced aluminum fins bonded to intergrooved copper tubing. Coils have sweat fitting refrigerant connections. Coils are ARI certified for a wide application of Rheem products. Coils have a drain pan made of high grade, heat resistant, corrosion free thermal-set material. Ideally suited for new installations or add on air conditioning. Condensate drain connections are 3/4" for ease of connection. Coils are tested at the factory with an extensive refrigerant leak check for improved quality control.
